Subject: Docket # 2007-286-WS

Mr. Hamilton;

I notice on The PSC website that Utilities Services of SC is appealing the decision order denying increase in rates and charges that was issued 2/11/2008, order # 2008-96. They wanting to have it reconsidered and have the issue increase under bond. Several of us feel that before the Commissioners grant this request that you should include the customers of USSC. I think on the findings by The Regulator Staff and the PSC, that Utilities Services of SC is making a good profit and has a good capital for this Company to operate. If only USSC would upgrade the water systems that they are responsible for.
Thank you for your consideration on this matter.
